DETAILED ACTION

This action is to correct and replace the incomplete final action that was mailed on 12/17/02.

*in response to interview of
2/25/03*

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 1-6, 9, and 19-21, is rejected under 35 U.S.C. 102(e) as being anticipated by Dean et al. (U. S. Patent Number 6,173,173)

Regarding claims 1- 6, 9, and 19-21, Dean et al. discloses all the claimed invention as set forth in the instant application, in addition Dean et al. discloses a invalid mobile telephone call terminating system and method further Dean et al. discloses a method for performing a detach of a terminal registered to a network by associating an identification for terminal deriving a signature for identification, and allocation a pair consisting of (which reads on client's request number) and "identification signature" (which reads on signature dn,) terminal, method comprising the steps of comprising "sending a detach request" (which reads on kill call request message) detach request including identification and identification signature from registered terminal to network as disclosed (column 7 lines 62-67), receiving detach request at the network side as disclosed (column 4 lines 1-5), comparing received detach request with a record of registration date of terminal kept at the network side request as disclosed (column 8 lines 1-7), detaching terminal from network (which reads on tearing down from the network a call or kill

Art Unit: 2681

call from the network as disclosed in column 1 lines 57-67), if received detach request coincides with said record of registration data as disclosed (column 8 lines 1-7) .

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 7-8, 10-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dean et al. in view of Kuriki (U. S. Patent Number 5,765,105).

Regarding claims 7,8,15,16,17,18, Dean et al. discloses everything claimed, as applied above (see claims 1) however, Dean et al. fails to specifically disclose temporary subscriber and international subscriber identity.

In the same field of endeavor, Kuriki further discloses a communication system capable of using a plurality of subscriber identity media sharing a single subscriber identity information. In addition Kuriki discloses a international subscriber identity in column 1 lines 25-30.

Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to improve Dean et al. by modifying a invalid mobile telephone call terminating system and method with the use of a temporary subscriber and international subscriber identity as taught by Kuriki for the purpose of authenticating the number.

Art Unit: 2681

Regarding claim 10, Dean et al. discloses everything claimed, as applied above (see claims 1) however, Dean et al. fails to specifically disclose sending a registration request from terminal to network.

In the same field of endeavor, Kuriki further discloses a communication system capable of using a plurality of subscriber identity media sharing a single subscriber identity information. In addition Kuriki discloses a registration request from a terminal to network as disclosed in column 4 lines 25-34.

Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to improve Dean et al. by modifying a invalid mobile telephone call terminating system and method with the use of a registration request from a terminal to network as taught by Kuriki for the purpose of authenticating the number.

Regarding claims 11-14, Dean et al. discloses everything claimed, as applied above (see claims 1) however, Dean et al. fails to specifically disclose a registration request from terminal to network.

In the same field of endeavor, Kuriki further discloses a communication system capable of using a plurality of subscriber identity media sharing a single subscriber identity information. In addition Kuriki discloses a registration request from a terminal to network as disclosed in column 11 lines 48-64.

Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to improve Dean et al. by modifying a invalid mobile telephone call terminating system and method with the use of a registration request from a terminal to network as taught by Kuriki for the purpose of authenticating the number.

Response to Arguments

3. Regarding the interview held on 2/25/03 after further review of the prior art the examiner contends that the Dean reference does read on detaching a call from the network, the act of terminating a call is detaching it .

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
